

RAUVISIO ingrain™ wood fiber laminate surface

Comparison with melamine & real wood

Appearance: Natural wood veneer

Material: Wood fiber laminate

Construction: PUR laminated face and back

Core: Particle board

Double-sided: Yes

Edgeband: REHAU LaserEdge & ABS

Horizontal and vertical surface applications: Vertical only

Board size: 1245 x 3073 x 19.5 mm (49 x 121 in)

Door style: Slab

Features & benefits:

- High-definition print
- 3x thicker than melamine paper
- High-performing, sustainable surface
- Made of natural cellulose fibers
- Free of melamine resins, formaldehyde, phenol and solvents
- Double-sided finished panel or cabinet door

Accessory products:

- Integrated handles

What is the difference between RAUVISIO ingrain and textured melamine (TSS)?

RAUVISIO ingrain	Textured melamine
Looks and feels just like pre-finished veneer	Looks like an artificial surface
High-definition print quality looks like real woodgrain	Print quality is not as crisp due to inks being exposed to resin bath
Eco-friendly product, free of melamine, phenol, and formaldehyde resins	Made of melamine and phenols

Textured melamine: Panels made of very thin decorative paper (typically 0.075 mm thick).

What is the difference between RAUVISIO ingrain and real wood?

RAUVISIO ingrain	Real wood
Fully-balanced, engineered panel that resists warpage, even on larger doors	Prone to warpage, especially on larger doors
Batch-to-batch color and pattern consistency	Very difficult to match batch-to-batch and color fades over time
More sustainable	More expensive option

Real wood: Solid and durable, but prone to warpage and decorative stains. Over time, it will fade and discolor and become extremely difficult to match.
